

**Lets look on the other effects:**

<b>Physical Effect</b>	<b>Financial Effect</b>	<b>Psychological effects</b>
<ul style="list-style-type: none"> <li>• Effect on Ecology- Hamper on Primary producer to apex consumer.</li> <li>• Imbalance on input-process-out put matrix also production-consumption.</li> <li>• Social Pressure- pressure on life need-consumption-requirement</li> </ul>	<ul style="list-style-type: none"> <li>• Cost of production will be high.</li> <li>• Human resource will be reduced and vulnerable.</li> <li>• Instability in human action; distress migration.</li> <li>• Pressure on financial institution like BIHAN/Banks etc; may be chance of mushrooming of illegal financial options</li> </ul>	<ul style="list-style-type: none"> <li>• Chance of increase criminal activity</li> <li>• Reduction of happiness index</li> </ul>

**So, some points of thinking base on mitigation and management can be think:**

<b>Structural/Operational</b>	<b>Technical</b>	<b>Social</b>	<b>Spiritual</b>
<ol style="list-style-type: none"> <li>1. Focus on millets, Pulses, oilseeds, coarse grains like black gram, mustard, lentil, Horse Gram specially which are low water loving will be introduced.</li> <li>2. Emphasis on traditional seeds/HYVs short duration varieties for all crops.</li> <li>3. Vegetables like combination of Leafy-Cucurbits-Solanacious can be introduced as food as well as nutrition.</li> <li>4. Crop insurance dates and nature can be extended .</li> <li>5. Structural financial assistance through women collectives by</li> </ol>	<ol style="list-style-type: none"> <li>1. Introduce of early variety in any crops( Thumb rule: Reproductive growth stage not more than 35-55 days.</li> <li>2. Emphasis on Land treatment; fragment land in temporary as well as permanent bunding.</li> <li>3. Lower down input cost in aftercare of crops like introduce gradual reduction of chemical fertiliser by organic fertiliser and NPM concept.</li> <li>4. Request irrigation department to lower down</li> </ol>	<ol style="list-style-type: none"> <li>1. Discussion on GPs and Village Organisations of DAY-NRLM on risk mitigation and management module.</li> <li>2. Campaign on save resource and stop exploitation resource.</li> <li>3. Training on water use.</li> </ol>	<ol style="list-style-type: none"> <li>1. Save for your neighbour- Altruism</li> <li>2. Save food from six days for seventh day.</li> </ol>

<p>RF/CIF/VRF.</p> <p>6. Emphasis on MGNREGA to open early and emphasis on WHS,LL especially on IBS</p> <p>7. Increase of Minimum Support Price on forest and Farm produce.</p> <p>8. Vaccination schedule on BYP and Goatry. Lower down the mortality and enhance poor persons ATM</p> <p>9. Emphasis on Skill development work e.g-Brick making and other value addition works</p>	<p>introduce water exploitation models of irrigation like boar in this year.</p> <p>5. Introduce low cost tool in hiring basis to small and marginal farmers.</p> <p>6. Module on risk mitigation &amp; water use in community level.</p> <p>7. Module on watershed management in line departments.</p>
